## TIME FOR WINTERIZATION

Now is the time to start thinking about scheduling the winterization of your boats! Before the mercury dips below freezing, you need to prepare your boat for the coming winter. Fresh water expansion can crack an engine block, damage fiberglass, split hoses, or destroy a refrigeration system overnight. Please call the office to schedule your winterization. Better sooner than later!

## NEEDING ASSISTANCE?

We still monitor VHF channel 16, or you can also call the office at (903) 463-3999. If you have any concern or emergency you can also call the night watchman at (903) 271-0969.

## WINTERIZATION NOTICE!

**IT IS IMPORTANT THAT THIS LETTER BE RETURNED ASAP SO THAT ANY WORK REQUIRED MAY BE SCHEDULED PRIOR TO THE FIRST DAMAGING FREEZE.**

Once again, the fall season is here, and it is time to think about WINTERIZING your boat. We recommend a program, which not only includes winterization but also the ANNUAL PREVENTATIVE MAINTENANCE, prescribed by most boat manufacturers. The preventative maintenance recommended not only helps prevent costly future repairs, but also makes your boat ready to go in the spring without the usual spring engine oil change, outdrive lubrication and lower unit oil change. Mercruiser policy that all oil and lubricants be changed before winter lay up only makes sense. It is explained in your owners' manual.

The individual services performed in the winterization program and prices for each service are as follows. Please check the items you desire and return this letter by mail, E-mail to [eyc@eisenhoweryachtclub.com](mailto:eyc@eisenhoweryachtclub.com) with the authorization signed by you in the space provided. No work will be performed without your authorization.
